Resourcing Yourself: Professionally and Personally

Noting the unique issues and stresses that arise in the practice of family law this event is aimed at minimising the risk of vicarious trauma to family law, personal injury and medical negligence lawyers and allied professionals such as psychologists, family reporters and HR professionals in their dealings with clients.

We will attempt to address and cover the dynamics and profiles of clients who are often at their most vulnerable and that fact that lawyers find themselves navigating issues such as assessing and documenting risk of family violence without the social scientist background or skills.
